Rationale

"Smoking remains the single biggest preventable cause of premature death in the UK today. Around half of all long-term smokers will eventually die as a result – about 15 people a day in the North East alone.

Approximately 26,000 people within Redcar and Cleveland are smokers and the majority of smokers start as children. Every year sees 207,000 children start smoking - nearly 9,000 children in the North East ([Cancer Research UK](#)). A survey of North East smokers found the average age for starting was just 15.

According to the 2010 Royal College of Physicians report, "Passive smoking and children"^[1], parents who smoke in front of their children significantly increase their child's risk of disease and ill-health. Based on these national figures, it is estimated that there are 357 additional incidents of childhood disease each year within Redcar and Cleveland directly attributable to passive smoking."

Bankfields Primary School acknowledges that second hand tobacco smoke is both a public and work place health hazard and has therefore adopted this no smoking policy.

Bankfields Primary School is in an ideal position to influence the health of the community we serve. Our ethos combined with our smoking education programme and the messages given about tobacco have key roles to play in reducing smoking amongst young people, staff and visitors.
